

HARBOR UCLA MEDICAL CENTER SURGERY/EMERGENCY ADDITION PROJECT LOS ANGELES COUNTY

TORRANCE, CA

PROJECT DESCRIPTION:

Harbor UCLA Medical Center is a 570-bed acute-care facility, owned and operated by the County of Los Angeles. The facility is a major teaching hospital and acute-care facility which provides 24-hour emergency services and contains 10 operating rooms, 8 intensive care units and numerous outlying out-patient clinics, laboratories and research centers.

The 190,000 sq ft surgery/emergency room addition project includes a three-story addition to the existing facility, renovation of the first floor lobby area and the existing emergency and surgery areas of the facility. The addition will create new state-of-the-art surgical suites. The addition is planned to utilize the latest in electronic radiology, patient monitoring, patient medical record keeping and remote collaboration techniques.

ACSI'S RESPONSIBILITIES:

ACSI was engaged by the County's Project Manager to provide a peer review of all the planned electronics systems and develop a commissioning plan for the mechanical, electrical, electronic, transportation, acoustical, and building envelope services. To date, ACSI has worked with the county project team to oversee and provide technical consulting regarding the preparation of the low-voltage systems portion of the formal scoping documents for this design-build project. Anticipated future services include review and comment on the design-build contractors conceptual and design documents and leading the planned facility commissioning services through project completion.
